smart by definition - dynamiX star in Pool Blue / Metallo mix

energetic, highly functional, top quality

Maximum support

Style: 5537 dynamiX star

Honored with the ISPO Award and renowned Red Dot Design Award, the dynamiX star sets the bar high when it comes to sports bras that deliver top-performance power. And justifiably so. The underbust band is made of extra-light microfibre. The seamlessly moulded cups have a double-layered piqué knit texture on the outside. In addition to that, the moisture-transporting terry cloth facing the skin besides the mesh insert to the front acts as an additional cooling zone. All theses features provide maximum support even during high-intensity sports. Added to this is the ergonomic strap system developed exclusively for Anita, which is setting whole new standards. Fully padded, adjustable at the front and designed to sit away from the neck, the straps form a cross-back that extends to the side seams and is lined with fast-drying CoolMax® mesh. Not only does this help the bra provide relief and prevent the build-up of annoying tension, it also makes it easier to put on and take off. Despite the many functional features, the focus is still very much on stylish design: the autumn/winter 2019 edition of the dynamiX star is a real statement of style and scores points with a highly fashionable Pool Blue / Metallo colour mix.

The perfect accompaniment: a light, pretty sports panty made of breathable microfibre that feels pleasant on the skin and presents mesh inserts to the sides that transport moisture away from the body.
