

FRAMISITALIA

BONDING TECHNOLOGY

Footwear

About us

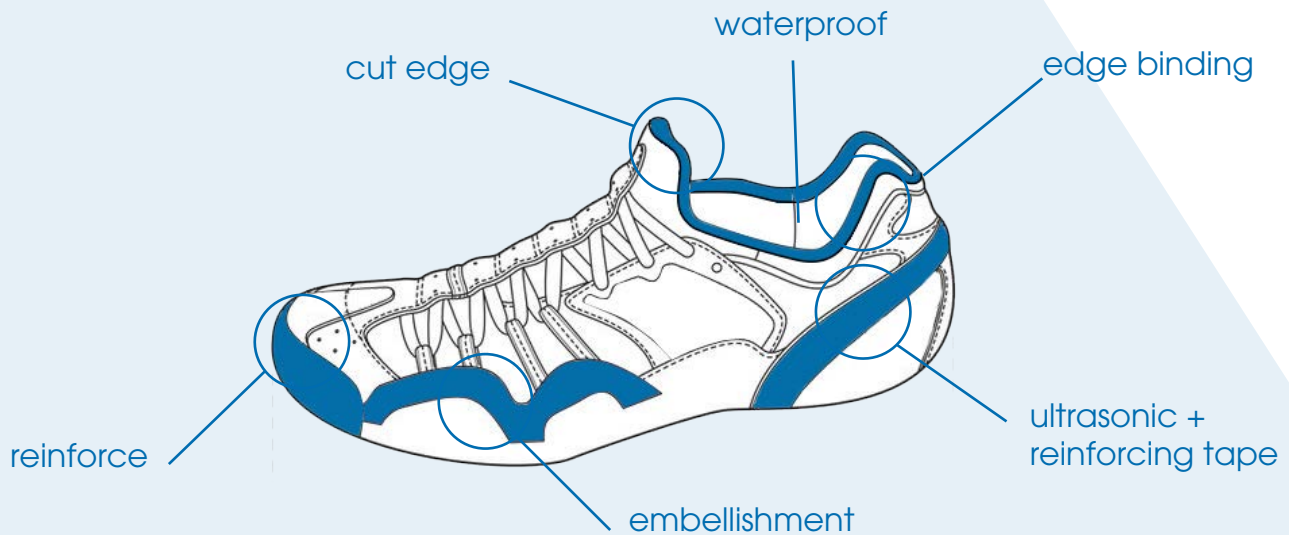

Framis Italia was born 40 years ago from the winning idea of promoting the use in clothing of a new polyurethane elastic tape, the Framilon®. Since then, the Company has developed and improved the NoSo® heat-welding system, increasingly meeting the demand for new creativity and improved quality expressed by major stylists and designers worldwide.

Noso® Bonding technology

Framis Italia is the only Company that designs and develops both the heat-welding products and the machines that apply them, making the Noso® Technology perfect also for footwear's world.

The variety of one-side and two-side adhesive films and tape, available with various effects and finishing, allows functional, structural and decorative applications, with no limits to creativity.

Application ideas

Products

Dream: 100% polyurethane tape and film, very versatile and available in more than 50 colors

Dream Reflective: reflective product with color card

Thicker Dream: 100% polyurethane film, to reinforce and decorate

Portofino: adhesive tape with fabric surface

Panarea: tape and film to reinforce ultrasonic joining

Fit: elastic adhesive tapes to bind the collar

Colorado: 3 layer seamsealing tape, high abrasion resistant

Laminated Fabrics: fabrics can be laminated with double sided adhesive film and than laser cut to create decorative or reinforced areas.

Machines

MP 301HK - Heat press

MX 208s- Edge binding machine

MU 280 - Ultrasonic machine

MX 204 - Weld & Cut machine

MX 206 / MX 236 - High Pressure machine

MX 210 - Taping / Weld & Fold machine
