## Packing a punch in winter tones – fitness sport tights

highly functional, ergonomic, silky smooth

### Style: 1685 fitness sports tights

Strictly ergonomic tailoring, figure-hugging fit in a capri length and a whole host of high-tech features – now in their second season, the fitness sports tights cut an exceptionally good figure no matter what the terrain. This is thanks to the silky smooth, high-cut waistband and super-flat, stretch seams, besides the mesh cooling zones in the back section and the breathable, extremely stable microfibre fabric that guarantee optimal moisture transport and a pleasantly dry feeling of comfort. Reflector stripes worked into the sides ensure even greater safety when training

after dark. There's even space for keys and a phone in the zip pocket integrated into the back of the waistband. In autumn/winter 2019, the fitness sports tights will be available in classic jet black and in a trendy Pool Blue/Anthracite two-tone look.

The fitness sports tights go brilliantly with the *Anita active* sports bras – and the new sports tights model will leave customers spoilt for choice.

ACTIVE
